ELITE CONVENTION HALL

PRODUCT REQUIREMENTS DOCUMENT (PRD)

Convention Hall Portfolio & Event Inquiry Website

Document Details	Information
Project Name	Elite Convention Hall Website
Document Type	Product Requirements Document (PRD)
Version	1.0
Document Status	Client Review
Prepared For	Elite Convention Hall
Prepared By	DataPulse Global
Date	October 2026

DOCUMENT PURPOSE

This document outlines the proposed website structure, features, functional requirements and user workflows for the Elite Convention Hall Portfolio & Event Inquiry Website.

It is prepared for client review and confirmation to establish a clear understanding of the proposed website scope before development begins.

Prepared by DataPulse Global

Confidential — For Client Review & Project Scope Confirmation **October 2026**

CONTENTS

Project Objective
Website Information Architecture & Section Overview
Navigation Bar Details
1. Hero Section
2. About Us
3. Gallery
4. Query Calendar Section
5. Facilities Section
6. Vendor Details Section
7. Client Reviews Section
8. FAQ Section
9. Contact Us Section
10. Footer Section
11. Admin Panel & Content Management System (CMS)

Project Objective

The objective of the Elite Convention Hall Website is to establish a **professional, visually engaging and user-friendly** digital presence that effectively **showcases the venue, facilities, event experiences, gallery, and organizational information** while enabling prospective clients to submit event inquiries through a clear and structured process.

The website will provide a streamlined inquiry journey designed to help visitors express interest in a specific event date and shift:

Query Calendar → Select Preferred Date → Select Preferred Shift → Complete Inquiry Form → Submit Inquiry → Inquiry Confirmation

To support client decision-making, the Query Calendar will display the number of inquiries received for each date. This information is intended only to indicate inquiry activity and will not represent real-time venue availability, confirmed bookings, reservations, or blocked dates.

All submitted inquiries will be reviewed by the Elite Convention Hall team, who will subsequently communicate with the prospective client to confirm actual venue availability, discuss event requirements, and proceed with the next steps where applicable.

Overall, the website is intended to function as both a professional venue portfolio and an effective lead-generation platform, helping Elite Convention Hall attract prospective clients, present its services clearly and simplify the initial event inquiry process.

Website Information Architecture & Section Overview

User Side:

Primary User Role: Prospective Client / Website Visitor
Access Type: Public Website - no login or registration required.

The visitor can explore Elite Convention Hall, review venue information, browse event galleries and facilities, check inquiry activity for preferred dates, select a date and shift and submit an event inquiry.

Full Website Section Structure

Order	Section	Purpose
1	**Hero Section**	Create a strong first impression, introduce Elite Convention Hall, communicate the main value proposition and guide visitors toward the primary **Check Venue Availability** action.
2	**About Us**	Build credibility by presenting Elite Convention Hall, its service approach, experience, brand values and commitment to delivering quality event experiences.
3	**Gallery**	Showcase venue spaces, previous events, stage setups, decorations, dining arrangements, corporate events and other visual experiences to help visitors understand the venue environment.
4	**Query Calendar**	Allow visitors to view the inquiry count for each date, select their preferred event date, choose a preferred shift, and continue toward the event inquiry process. Visitors may also proceed to the inquiry form directly when applicable.
5	**Facilities**	Present the venue facilities, amenities, available spaces, capacities and important service features so visitors can understand what Elite Convention Hall provides.
6	**Vendor Details**	Present approved or associated event vendors and additional event-related services that may support customers in planning their events.
7	**Client Reviews**	Build trust and confidence by presenting feedback, testimonials and experiences from previous Elite Convention Hall clients.
8	**FAQ**	Address common questions related to inquiries, events, facilities, venue policies, payments, capacity, services and other frequently raised concerns.
9	**Contact Us**	Provide direct communication options including phone number, WhatsApp, email, venue address, map/location information and other applicable contact channels.
10	**Footer**	Provide quick navigation links, contact information, social media links, policies, copyright information, and other important website references.

Website Section Flow

The website will follow the sequence below:

1. **Hero Section**
   2. About Us
   3. Gallery
   4. Query Calendar
   5. Facilities
   6. Vendor Details
   7. Client Reviews
   8. FAQ
   9. Contact Us
   10. Footer

Primary User Journey

The primary conversion journey of the website will be:

Hero Section
→ Check Venue Availability
→ Query Calendar
→ Select Preferred Date
→ Select Preferred Shift
→ Complete Inquiry Form
→ Submit Inquiry

→ **Inquiry Confirmation**

→ **Elite Convention Hall Team Reviews & Contacts the Client**

This structure ensures that the website functions as both a **professional venue portfolio** and a **lead-generation platform**, while keeping the inquiry process simple and clear for prospective clients.

Navigation Bar Details

The navigation bar will provide clear and direct access to the primary sections of the **Elite Convention Hall website**. It should remain simple, professional and easy to use so visitors can move quickly between key information areas and the event inquiry process.

Navigation Structure

Logo | Home | Query Calendar | Gallery | Facilities | About Us | Contact

Navigation Item	Purpose / Action
Logo	Display the official **Elite Convention Hall** logo on the left side of the navigation bar. Clicking the logo will return the visitor to the top of the Home page.
Home	Navigate to the main Hero Section of the website.
Query Calendar	Navigate directly to the Query Calendar where visitors can view date-wise inquiry counts, select a preferred event date, choose a shift, and proceed with the inquiry process.

Navigation Item	Purpose / Action
Gallery	Navigate to the Gallery section where visitors can preview event and venue images and access the full Gallery page containing all photo albums.
Facilities	Navigate to the Facilities section to review available venue facilities, amenities, spaces, and related service information.
About Us	Navigate to the About Us section containing information about Elite Convention Hall, its experience, service approach, and brand profile.
Contact	Navigate to the Contact Us section where visitors can access phone, WhatsApp, email, address, map/location, and other relevant contact information.

Navigation Bar Layout

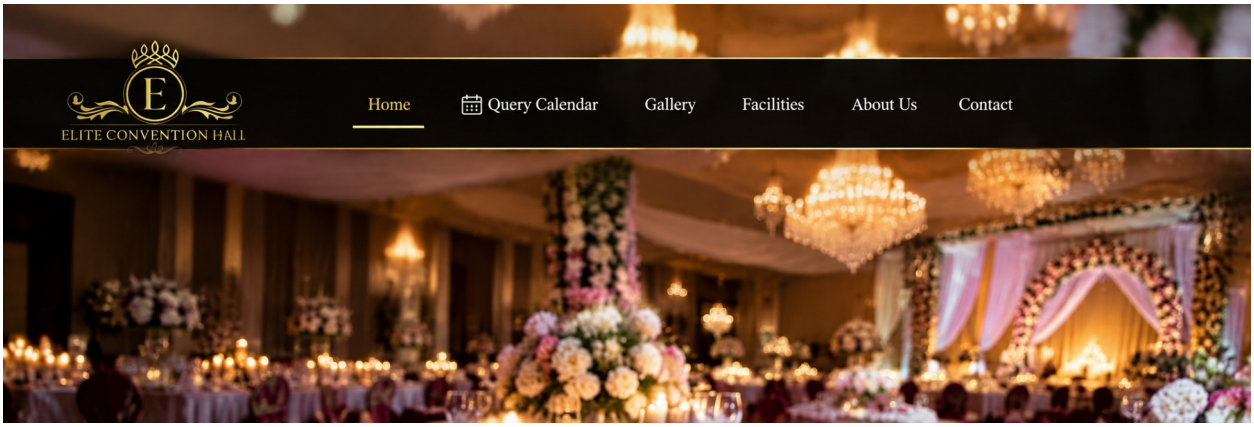

Figure 1: Navigation Bar — UI Reference

Left Side:

Official **Elite Convention Hall Logo**

Navigation Area:

Home | Query Calendar | Gallery | Facilities | About Us | Contact

Right Side:

No login, signup, profile or customer account options will be displayed, as the website is publicly accessible and does not require user authentication.

Navigation Behaviour

The navigation bar should remain clean and consistent across the website. The currently active section should be visually highlighted so visitors can easily understand their current location.

For the main single-page sections, clicking a navigation item should smoothly scroll the visitor to the corresponding section. If a visitor is on a separate page such as the **Full Gallery Page** or an **Album Details Page**, selecting a main navigation item should return them to the appropriate section of the main website.

On smaller screens, the navigation items should collapse into a responsive mobile menu while keeping the **Elite Convention Hall logo** clearly visible.

1. Hero Section

Purpose

The **Hero Section** will be the primary visual introduction to the **Elite Convention Hall website**. Its purpose is to create a premium first impression, immediately communicate the venue's positioning, and guide prospective clients toward the website's main conversion action **checking venue availability through the Query Calendar**.

The section should combine strong venue photography, concise promotional content, and a single prominent CTA to keep the visitor focused on the inquiry journey.

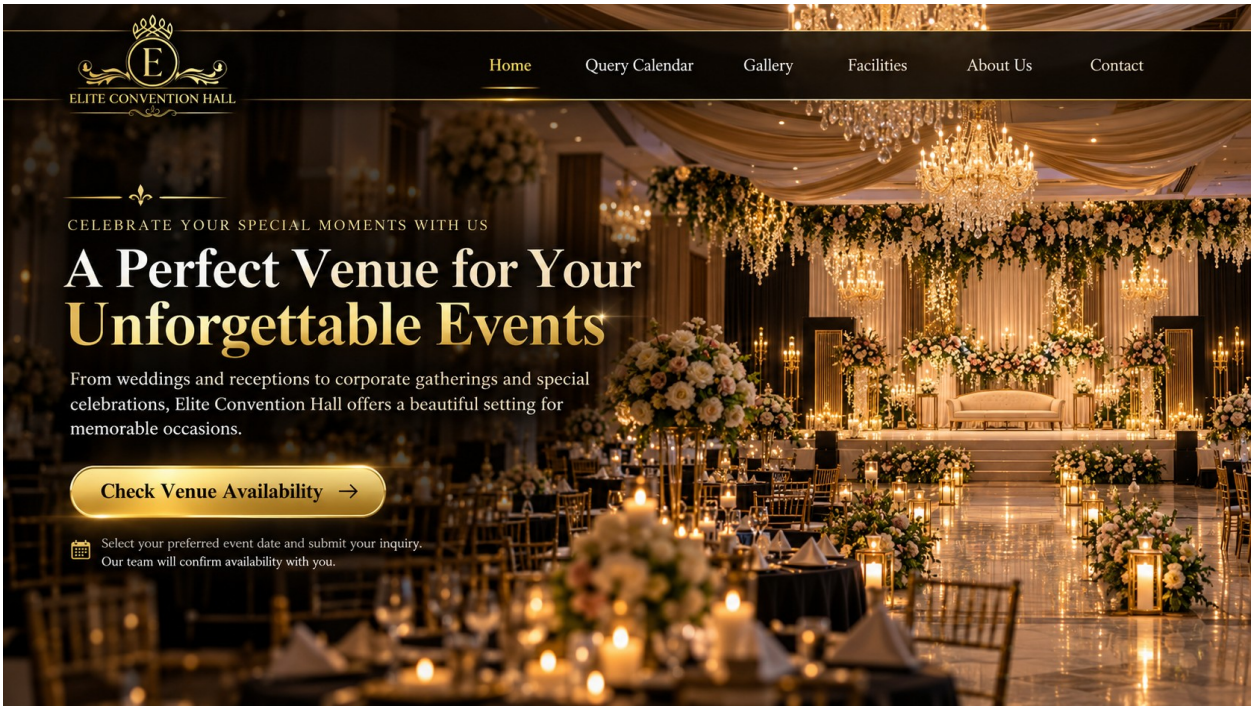

Figure 2: Hero Section — UI Reference

Hero Section Content & Functional Details

Element	Content / Requirement	Details
Background Visual	Premium Elite Convention Hall event/venue image	A high-quality full-width image should represent the actual venue atmosphere, event setup, stage, dining arrangement, or hall interior. A dark overlay may be applied to maintain text readability.
Section Tagline	**Celebrate Your Special Moments With Us**	Short supporting tagline positioned above the primary heading to establish an emotional and premium tone.
Main Heading	**A Perfect Venue for Your Unforgettable Events**	The primary Hero message. It should be visually prominent and communicate the venue's value immediately.
Supporting Description	Short introduction to the venue	Example: **"From weddings and receptions to corporate gatherings and special celebrations, Elite Convention Hall offers a beautiful setting for memorable occasions."**
Primary CTA	**Check Venue Availability**	Main conversion button of the Hero Section. It should be visually highlighted and clearly distinguishable from other website elements.
CTA Supporting Note	Availability clarification	Example: **"Select your preferred event date and submit your inquiry. Our team will confirm availability with you."**
Logo / Branding	Elite Convention Hall branding	The Hero Section should visually remain consistent with the official Elite Convention Hall logo, brand colors, and overall website design language.

Primary CTA Behaviour

When the visitor clicks:

Check Venue Availability

the website should navigate or smoothly scroll directly to the **Query Calendar Section**.

The interaction flow will be:

Check Venue Availability
→ Query Calendar
→ Select Preferred Event Date
→ Select Preferred Shift
→ Inquiry Form
→ Submit Inquiry

The CTA does **not** mean that the selected date is automatically available or reserved.

The final availability will be confirmed by the **Elite Convention Hall team** after reviewing the submitted inquiry.

Hero Section User Flow

Visitor Lands on Website
→ Views Elite Convention Hall Hero
→ Understands Venue Offering
→ Clicks **Check Venue Availability**
→ Navigates to Query Calendar
→ Continues Event Inquiry Process

Expected Outcome

The Hero Section should enable a new visitor to understand within a few seconds:

Who: Elite Convention Hall
What: Professional venue for events and celebrations
Why: Premium environment for memorable events
Next Action: Check Venue Availability

2. About Us

Purpose

Build trust and credibility by introducing Elite Convention Hall, its experience, service approach, and commitment to providing quality event experiences.

Figure 3: About Us — UI Reference

Element	Details
Section Title	**About Elite Convention Hall**
Intro Content	**Short introduction about the venue and its purpose.**
Brand Story	**Briefly present the background and identity of Elite Convention Hall.**
Service Approach	**Explain the focus on professional service, organized event support, and customer experience.**
Experience / Strength	**Highlight relevant experience, venue quality, event handling capability, and service standards.**
Brand Values	**Present values such as professionalism, quality, reliability, hospitality, and customer satisfaction.**
Venue Image	**Use one or more high-quality images of the hall, interior, exterior, or event environment.**

Element	Details
	Optional short points such as premium venue, multiple event types, professional support, and convenient event planning.
Key Highlights	

User Flow

Visitor Reaches About Us
→ Learns About Elite Convention Hall
→ Understands Experience & Values
→ Builds Trust in the Venue
→ Continues Exploring the Website

3. Gallery

Purpose

The **Gallery Section** will visually showcase the venue, previous events, stage setups, decorations, dining arrangements, corporate events, and other event experiences of **Elite Convention Hall**.

The main objective is to help prospective clients understand the venue atmosphere and event presentation through organized photo albums rather than displaying all images on the homepage.

The Gallery will follow a structured three-level browsing experience:

Homepage Gallery Preview → All Albums Page → Individual Album Page

Gallery Section Content & Functional Details

Element	Content / Requirement	Details
Section Label	**OUR GALLERY**	Small premium section label displayed above the main heading.
Main Heading	**Moments Made Memorable**	Main Gallery heading highlighting memorable events and venue experiences.
Supporting Description	Short Gallery introduction	Example: **“Explore stunning setups, elegant celebrations, and unforgettable events at Elite Convention Hall.”**
Gallery Presentation	Interactive featured album carousel	Homepage will display selected Gallery albums in a visually engaging carousel/cover-flow layout.
Featured Album	Main center card	The currently selected album will appear larger than the supporting album cards.
Supporting Albums	Previous / Next album previews	Additional albums will remain visible on both sides of the featured album.
Album Cover Image	Representative image	Each album should use a strong cover image representing that event category or setup.
Album Title	Example: **Wedding Stage Setup**	Clearly identifies the album.
Album Description	Short summary	Briefly describes what the album contains.
Album Navigation	Previous / Next controls	Visitors can browse featured albums using arrows or pagination indicators.
View Photos	Album-level navigation	Clicking an album card or **View Photos** opens the corresponding album.
View All Albums	Gallery navigation button	Opens the dedicated Gallery page containing all available albums.
Image Presentation	High-quality optimized photography	Images should remain realistic, professionally presented, and optimized for website performance.

Gallery Level 1 - Homepage Preview

The homepage Gallery section will provide a **preview of selected albums** rather than displaying the entire Gallery.

Recommended Featured Albums

Examples may include:

- **Wedding Events**
- **Reception Events**
- **Corporate Events**

The actual albums displayed will depend on the content available from Elite Convention Hall.

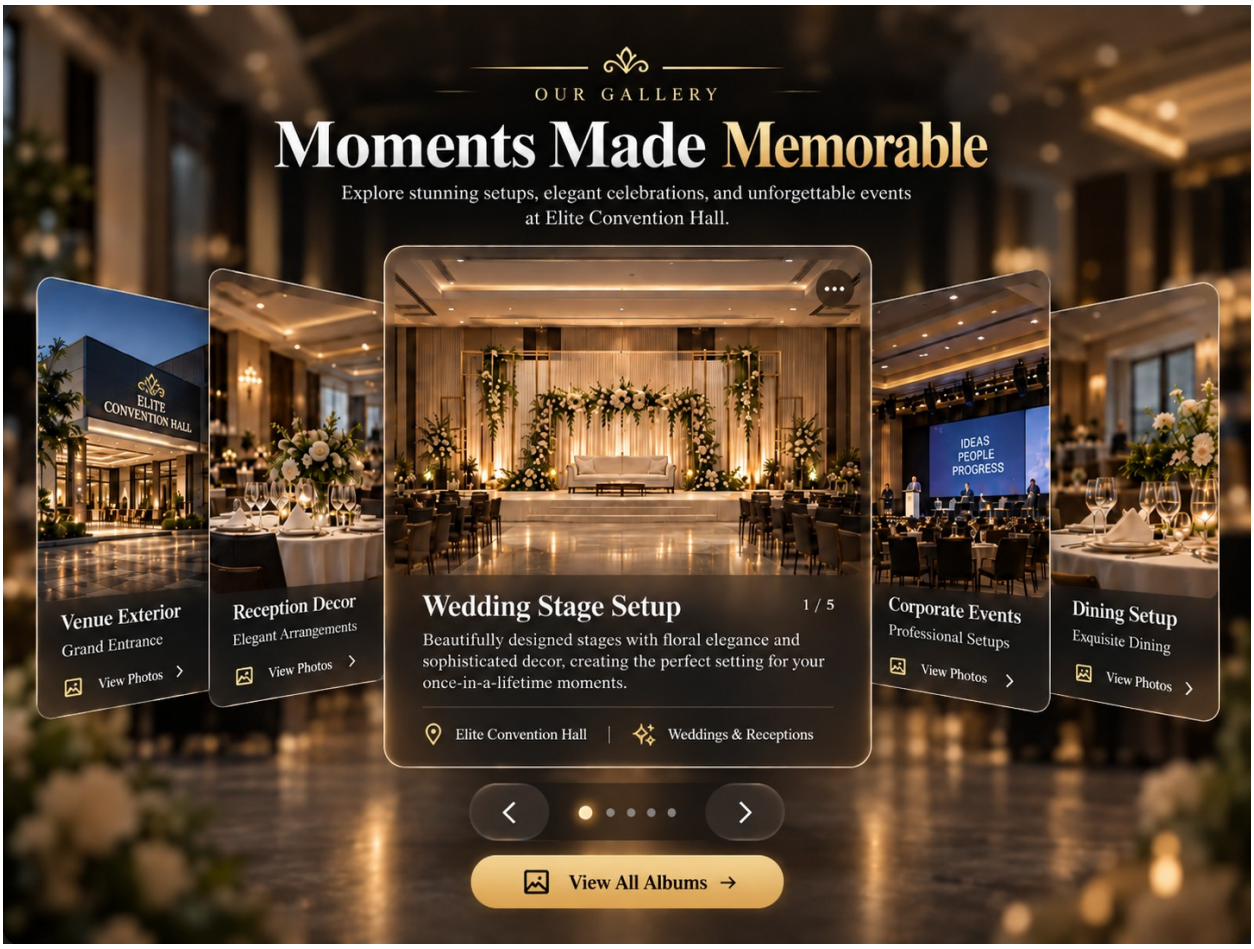

Figure 4: Homepage Gallery — UI Reference

Homepage Gallery User Flow

Visitor Reaches Gallery Section
→ Views Featured Albums
→ Browses Albums Using Previous / Next Controls
→ Views Album Titles & Preview Images
→ Clicks **View All Albums**
→ Opens Dedicated Gallery Page

Gallery Level 2 — All Albums Page

When the visitor clicks **View All Albums**, a separate Gallery page will open containing all published albums.

Page Heading

OUR GALLERY

Explore All Albums

Browse event albums and venue moments from Elite Convention Hall.

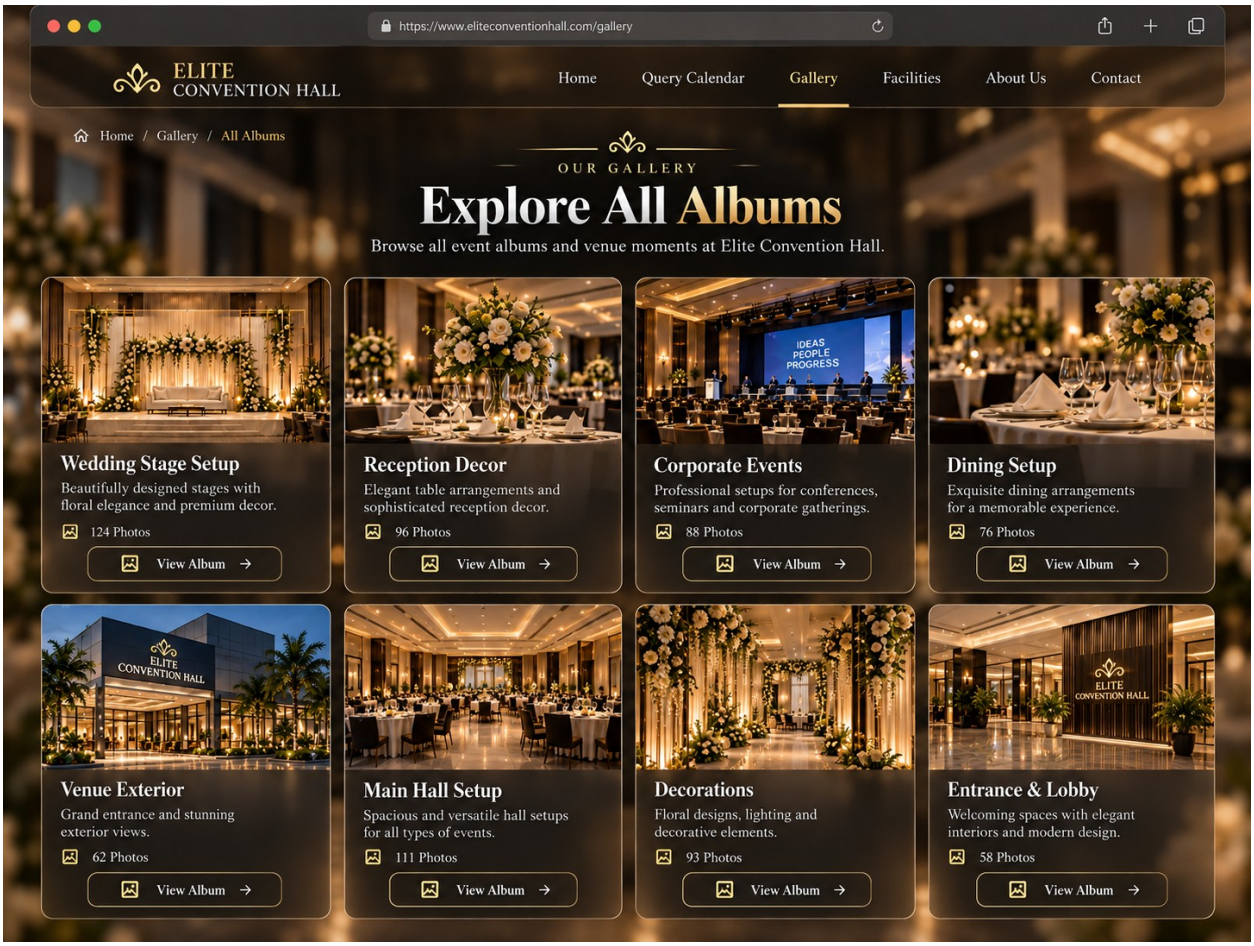

Figure 5: Gallery — All Albums Page

Album Card Information

Each album card should contain:

Album Information	Example
Cover Image	Wedding stage photo
Album Name	Wedding Stage Setup
Short Description	Beautifully designed stages with floral elegance and premium decor.
Photo Count	124 Photos

View Album →

Gallery Level 3 — Individual Album Page

When the visitor clicks **View Album**, the system will open a dedicated page containing all photographs belonging to that album.

Example:

Home / Gallery / Wedding Stage Setup

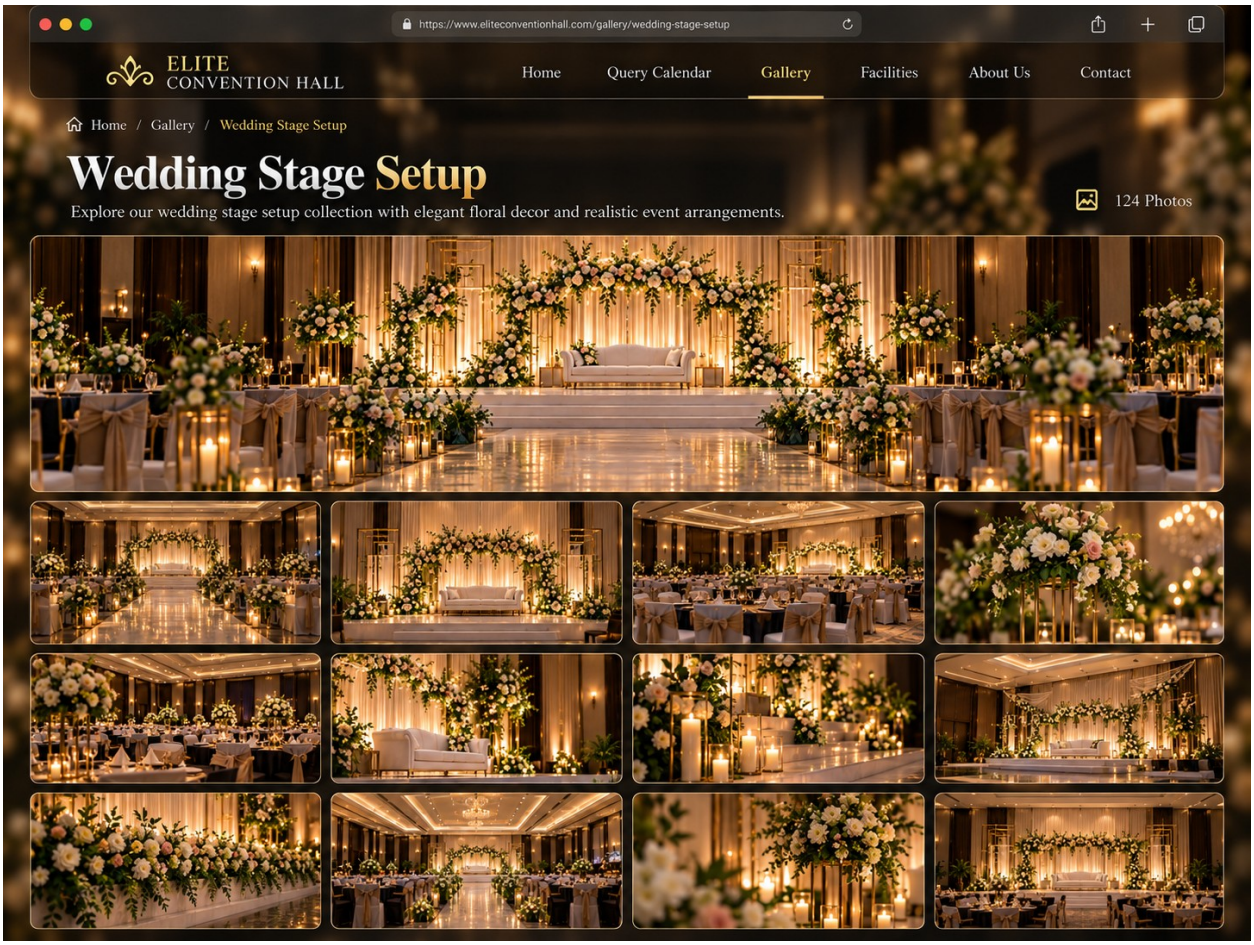

Figure 6: Gallery — Individual Album Page

Individual Album Page Features

Feature	Function
Breadcrumb Navigation	Allows visitors to return to Gallery or All Albums easily.
Album Title	Displays the selected album name.
Album Description	Briefly explains the album content.
Photo Count	Displays the total number of images inside the album.
Featured Image	A larger introductory image may appear at the top.
Photo Grid	Displays all images within the selected album.
Image Preview	Clicking an image opens it in a larger view/lightbox.
Previous / Next Image	Allows visitors to browse images while remaining inside the preview.

Feature	Function
Close Preview	Returns the visitor to the album grid.

Complete Gallery User Journey

The complete Gallery experience will be:

Homepage
→ Gallery Preview
→ Browse Featured Albums
→ View All Albums
→ All Albums Page
→ Select Album
→ View Album
→ Album Photo Gallery
→ Select Photo
→ Large Image Preview / Lightbox
→ Previous / Next Photo
→ Return to Album

Gallery Navigation Structure

The expected URL/page structure may follow:

Home
→ Gallery

Gallery
→ All Albums

All Albums
→ Wedding Stage Setup

Example hierarchy:

Home / Gallery

Home / Gallery / Wedding Stage Setup

This will make navigation clear and organized for visitors.

Final Gallery Flow Summary

Level 1 — Homepage Gallery

Featured Album Preview → View All Albums

Level 2 — Gallery Page

All Albums → Select Album → View Album

Level 3 — Album Page

Album Details → Photo Grid → Open Photo → Browse Images

Therefore, the complete flow is:

Gallery Preview → View All Albums → Album List → View Album → Album Photos → Image Preview

This structure keeps the homepage visually attractive while providing visitors with a dedicated and organized space to explore the complete **Elite Convention Hall Gallery**.

4. Query Calendar Section

Purpose

Allow visitors to view date-wise inquiry activity, select their preferred event date and shift, and continue directly to the event inquiry form.

Figure 7: Query Calendar — Monthly Inquiry Overview

Element	Details
Section Title	**Plan Your Event With Us**
Inquiry Calendar	Display a monthly calendar with the number of inquiries received for each date.
Month Navigation	Previous / Next controls allow visitors to browse different months.
Date Selection	Visitor selects the preferred event date from the calendar.
Inquiry Count	Each date shows the current number of inquiries. This does **not** indicate availability or confirmed booking.
Shift Selection	After selecting a date, a popup appears with **Day Shift** and **Night Shift** options.
Continue	After selecting a shift, the visitor proceeds to the Inquiry Form.
Selected Details	The chosen **date and shift** are automatically displayed in the form.
Inquiry Form	Collects the required client and event information.
Submit Inquiry	Submits the completed inquiry to the Elite Convention Hall team.
Confirmation	After successful submission, the visitor receives an **Inquiry Received Successfully** message.

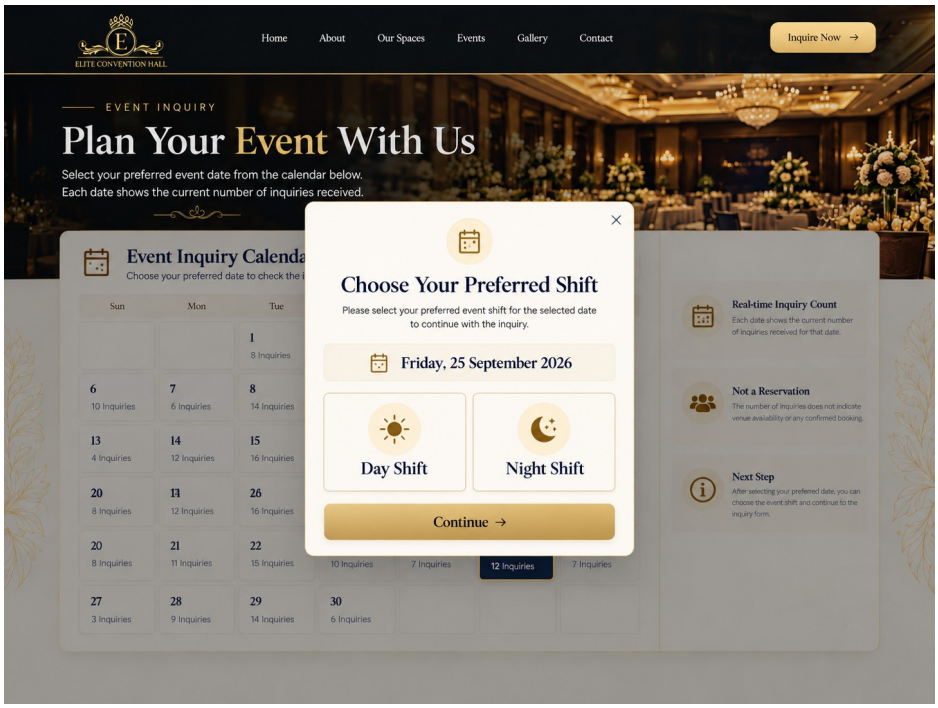

Figure 8: Query Calendar — Preferred Shift Selection

Query Calendar — Preferred Shift Selection

Inquiry Form Fields

- **Full Name**
- **Phone Number**
- **Email**
- **Event Type**
- **Number of Guests**
- **Company / Organization**
- **Additional Details**

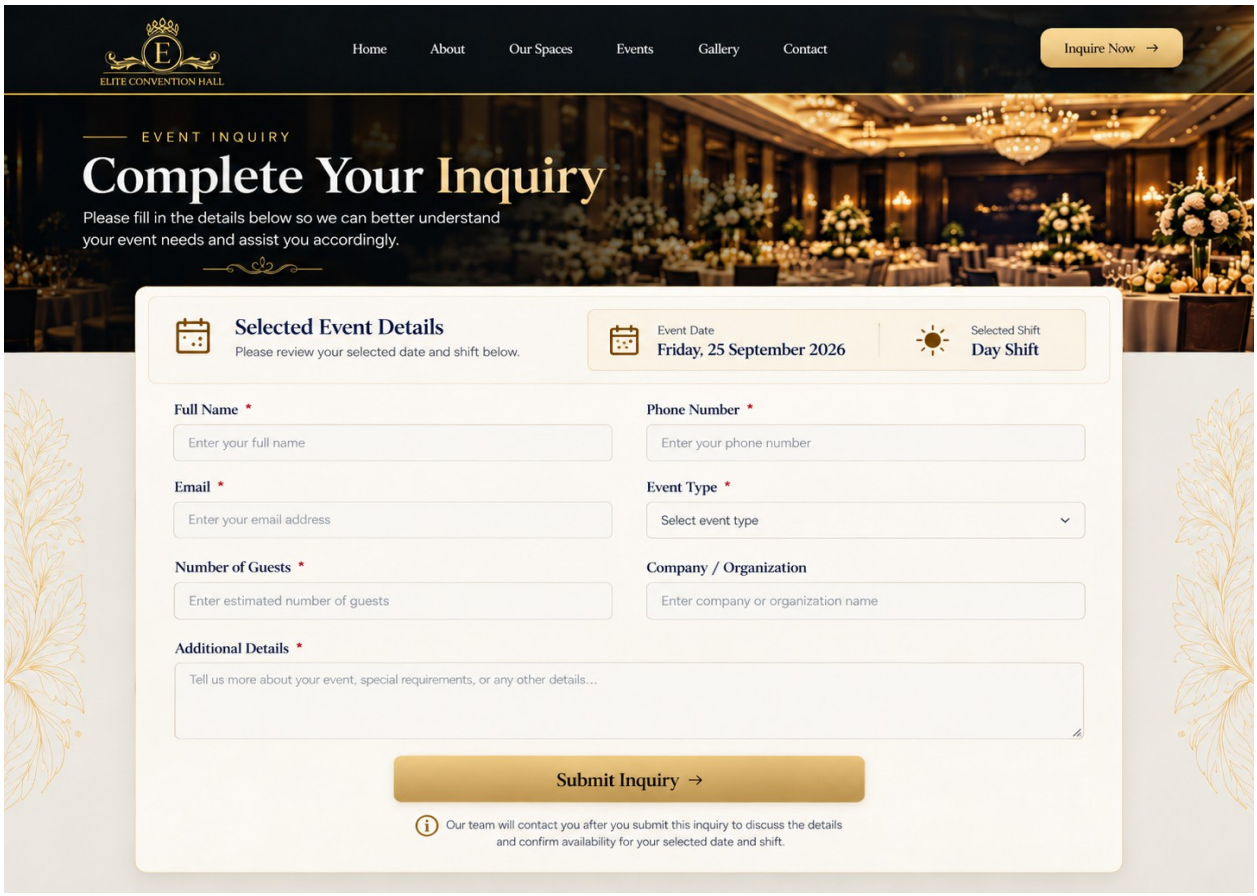

Figure 9: Event Inquiry Form — UI Reference

User Flow

Query Calendar
→ Select Preferred Date
→ Select Day / Night Shift
→ Inquiry Form
→ Submit Inquiry

Important Business Rule

The calendar only displays **inquiry activity**. It will not show any date as **Available, Unavailable, Booked, or Reserved**.

Final venue availability will be confirmed by the **Elite Convention Hall team** after reviewing the submitted inquiry.

5. Facilities Section

Purpose

Present the main facilities, amenities, venue spaces, capacities, and service features available at **Elite Convention Hall** so visitors can clearly understand what the venue offers.

Figure 10: Facilities and Amenities — UI Reference

Element	Details
Section Title	**Facilities & Amenities**
Venue Spaces	Highlight the main hall, stage area, dining space, entrance/lobby, and other available spaces.
Capacity	Display guest capacity or space information where applicable.
Amenities	Present important amenities such as air conditioning, parking, restrooms, bridal room, and other confirmed facilities.
Service Features	Show available event-support services and venue-related features.
Facility Cards	Each facility can include an image/icon, name, and short description.
Responsive Layout	Facilities should be displayed clearly across desktop, tablet, and mobile.

User Flow

Visitor Reaches Facilities → Reviews Spaces & Amenities → Understands Venue Capability → Continues Exploring or Proceeds to Inquiry

6. Vendor Promotion / Details Section

Purpose

Showcase approved or associated event vendors and supporting services that may help clients complete their event planning.

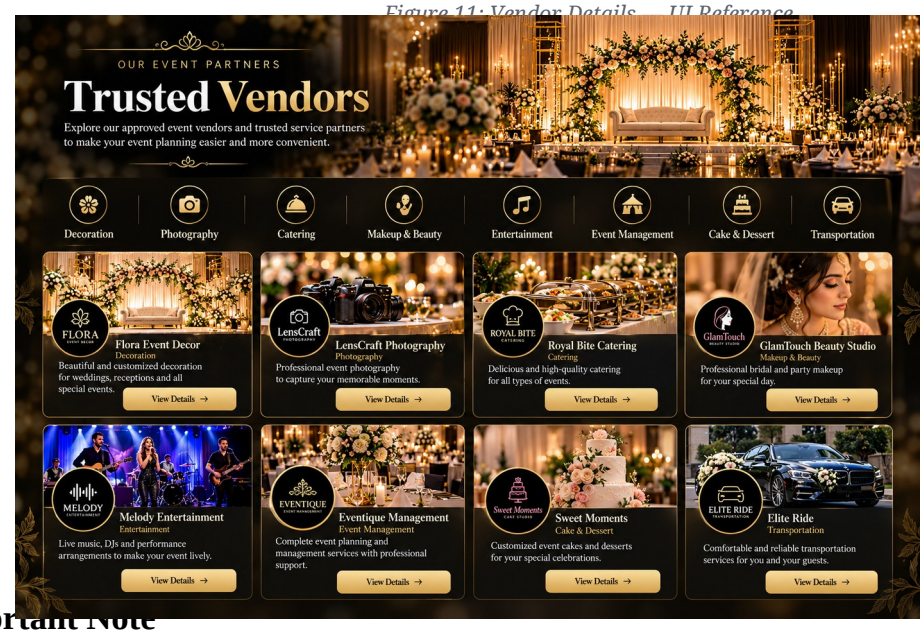

Element	Details
Section Title	**Our Event Partners / Trusted Vendors**
Supporting Text	Introduce selected vendors and event-related services available to clients.
Vendor Categories	Decoration, Photography, Catering, Makeup, Entertainment, Event Management, etc.
Vendor Card	Logo/Image, Vendor Name, Service Category, Short Description.
View Details	Opens the selected vendor’s detailed information.
Contact Information	Show phone, website/social link, or other approved contact details where applicable.

Element	Details
Promotion	Highlight special vendor promotions only when officially provided.
Layout	Clean card/carousel layout consistent with the Elite Convention Hall design.

User Flow

Vendor Section
→ Browse Vendors / Services
→ Select Vendor
→ View Vendor Details
→ Contact / Explore Vendor Service

Figure 11: Vendor Details — UI Reference

Important Note

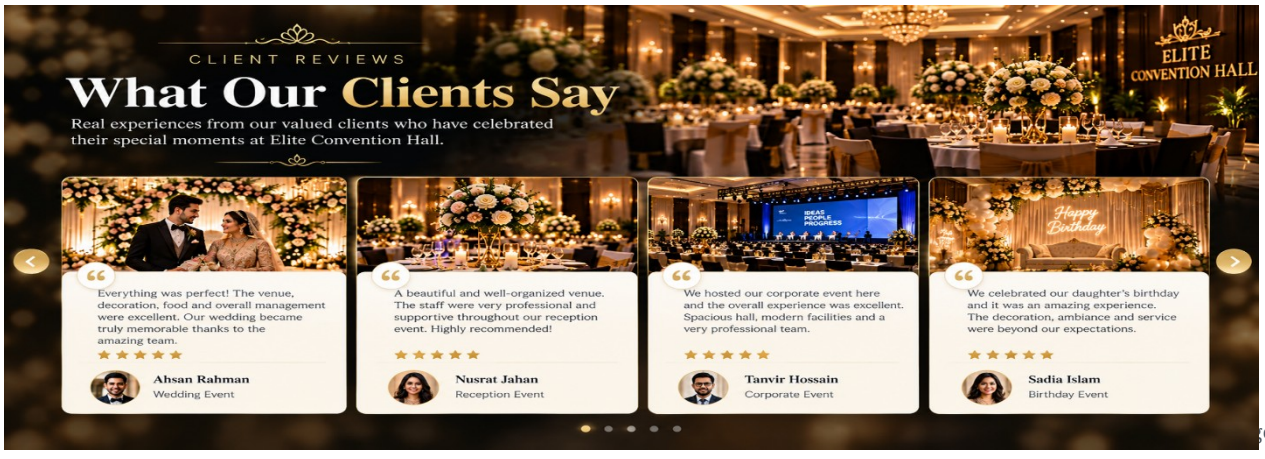

Only **approved vendor information and confirmed promotional offers** should be displayed.

7. Client Reviews Section

Purpose

Build trust and confidence by showing genuine feedback and experiences from previous **Elite Convention Hall** clients.

Element	Details
Section Title	**What Our Clients Say**
Supporting Text	Short introduction highlighting customer satisfaction and event experiences.
Review Cards	Display client name, review text, event type, and rating where available.
Client Photo	Optional profile image if permission is available.
Event Type	Example: Wedding, Reception, Corporate Event, Birthday, etc.
Rating	Star rating may be shown if collected from a verified source.
Carousel / Slider	Reviews can be displayed in a simple slider for better presentation.
Verified Source	Use only authentic client reviews or approved testimonials.

8. FAQ Section

Purpose

Provide clear answers to common questions about the venue, inquiry process, facilities, services, capacity, payments, and policies so visitors can quickly resolve their concerns.

Element	Details
Section Title	**Frequently Asked Questions**
FAQ Topics	Inquiry process, facilities, event types, capacity, services, payments, and venue policies.
Accordion Layout	Questions can be expanded and collapsed individually.
Clear Answers	Answers should be short, accurate, and easy to understand.
Categories	FAQs may be grouped by topic if the number of questions becomes large.
Responsive Design	FAQ interaction should work smoothly on desktop, tablet, and mobile.

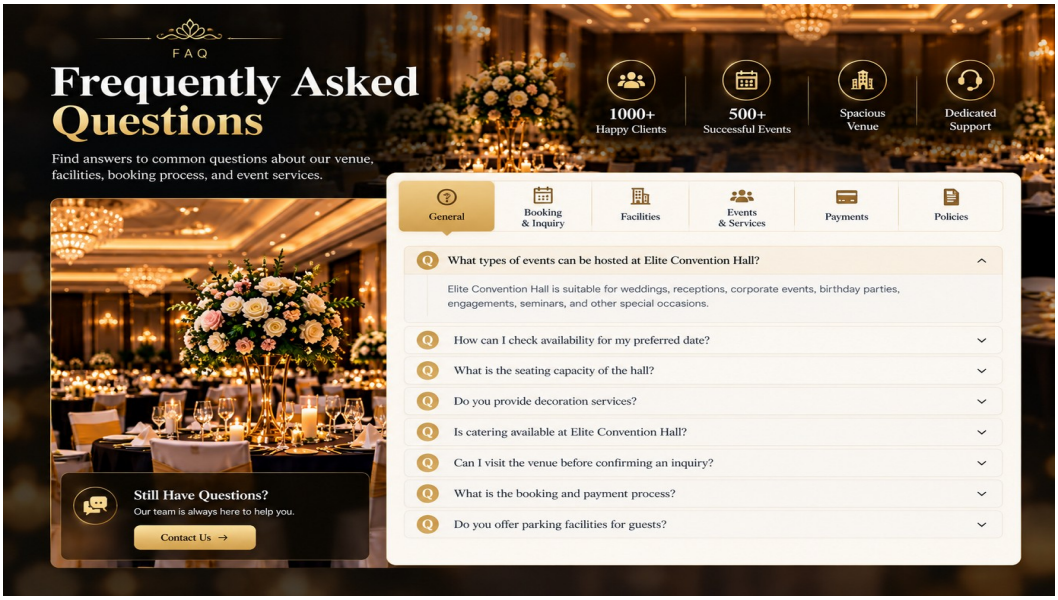

Figure 13: FAQ — UI Reference

9. Contact Us Section

Purpose

Provide visitors with direct and convenient communication options for event inquiries, venue information, and general assistance.

Element	Details
Section Title	**Contact Us / Get in Touch**
Phone Number	Display the official contact number with click-to-call functionality.
WhatsApp	Provide direct WhatsApp communication.
Email	Display the official email address with click-to-email support.
Venue Address	Show the complete Elite Convention Hall location.
Map / Location	Provide an embedded map or Google Maps link.
Social Media	Include official social media links where applicable.
Contact Hours	Display office/contact hours if required.
Quick Actions	Optional buttons such as **Call Now**, **WhatsApp**, or **Send Email**.

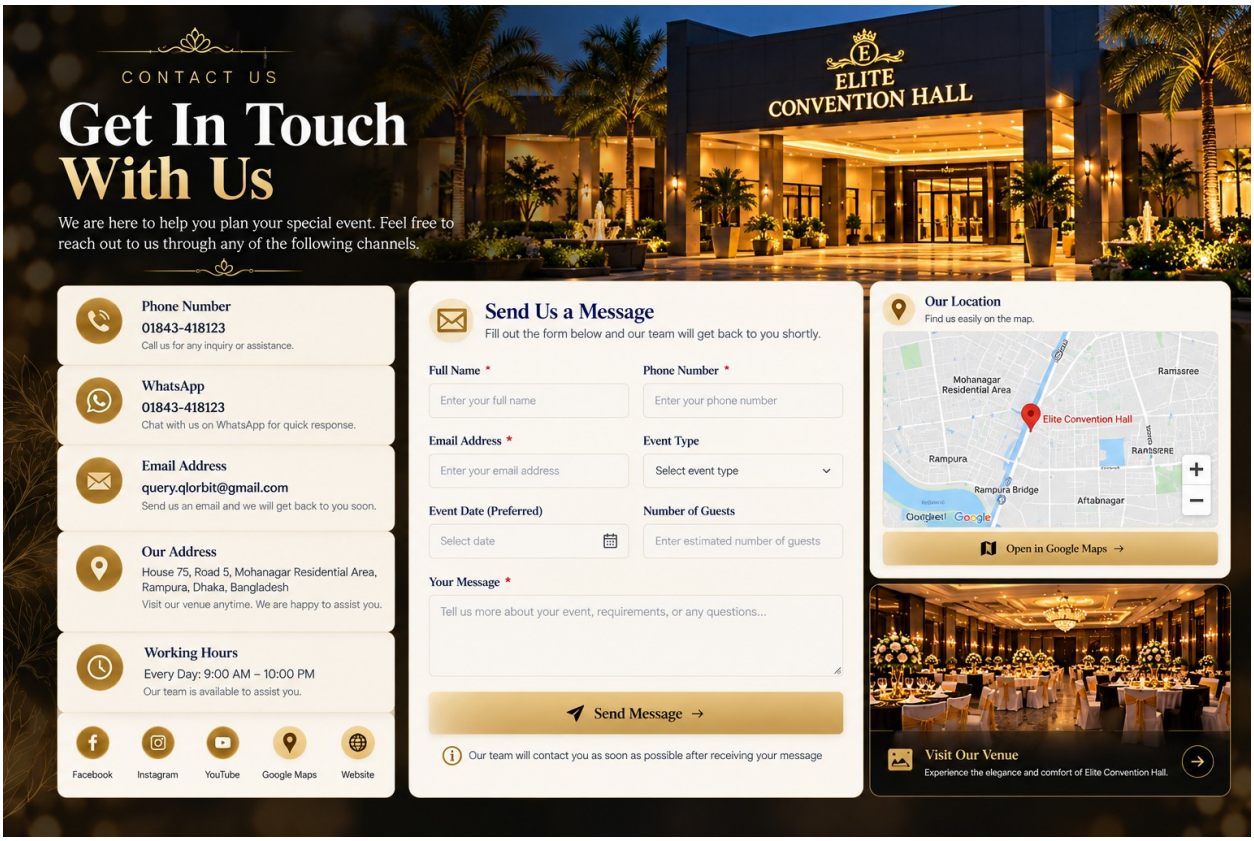

Figure 14: Contact Us — UI Reference

User Flow

Visitor Reaches Contact Us → Selects Contact Method → Calls / WhatsApps / Emails / Views Location → Communicates with Elite Convention Hall

10. Footer Section

Purpose

Provide visitors with quick access to important website links, contact information, social media channels, and essential legal or policy information from any page of the website.

Element	Details
Logo & Brand Name	Display the official **Elite Convention Hall** logo and brand identity.
Quick Links	Home, Query Calendar, Gallery, Facilities, About Us, FAQ, and Contact Us.
Contact Information	Phone number, WhatsApp, email address, and venue address.
Social Media Links	Links to official Facebook, Instagram, YouTube, or other approved social platforms.
Location Link	Provide quick access to the venue location / Google Maps.
Policies	Links to applicable Privacy Policy, Terms & Conditions, or other website policies.
Copyright	Example: **© 2026 Elite Convention Hall. All Rights Reserved.**
Responsive Design	Footer content should remain clear and organized across desktop, tablet, and mobile devices.

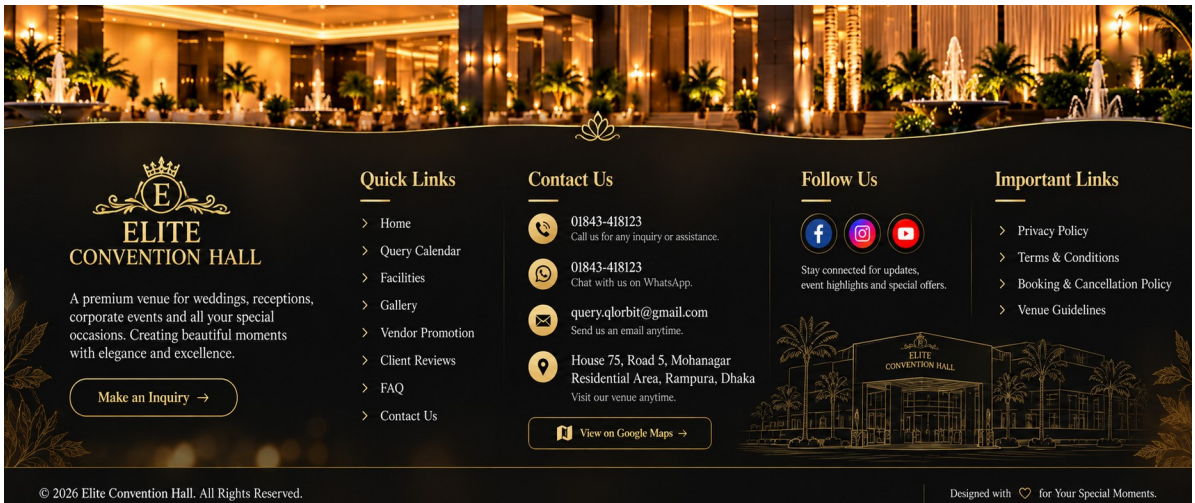

Figure 15: Footer — UI Reference

User Flow

Visitor Reaches Footer
→ Uses Quick Navigation / Contact Information / Social Links / Policies
→ Navigates to the required section or communication channel

The Footer should remain **simple, organized, and consistent with the Elite Convention Hall branding**, without adding unnecessary information.

11. Admin Panel & Content Management System (CMS)

Purpose

The **Admin Panel / CMS** will provide authorized Elite Convention Hall staff with a centralized interface to manage website content, control the inquiry-count information displayed on the Query Calendar, and review all event inquiries submitted by visitors.

The public website does not require customer login or registration; the Admin Panel will be a separate secured area for authorized staff only. The existing PRD defines the public Query Calendar as displaying inquiry counts by date and carrying the selected date and shift into the inquiry process.

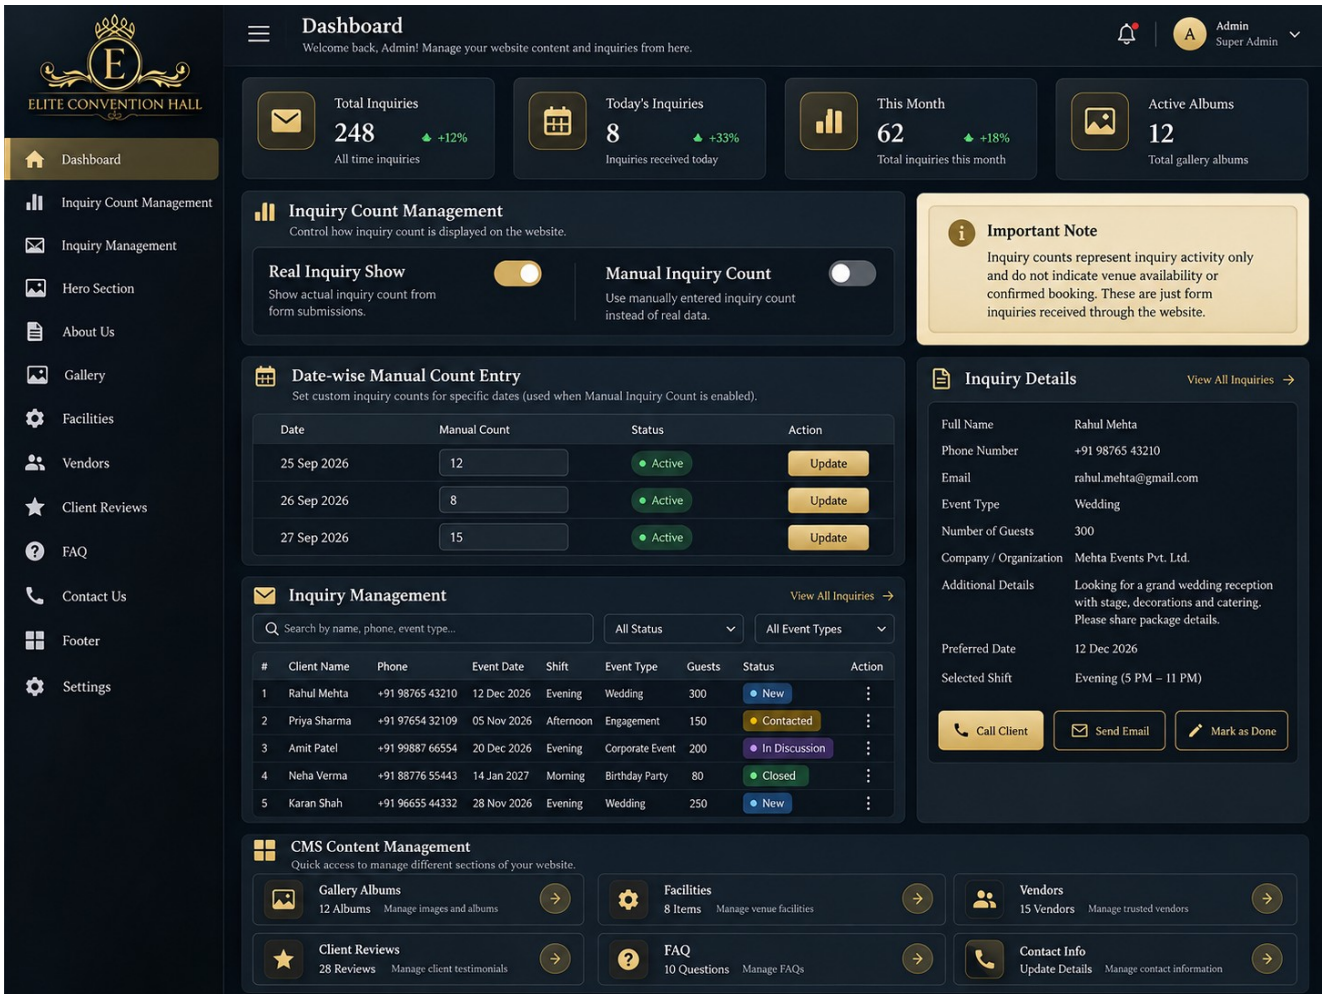

Figure 16: Admin Panel and CMS — UI Reference

Admin Modules Overview

Module	Purpose
Inquiry Count Management	Control whether the Query Calendar displays real inquiry counts or manually entered date-wise inquiry counts.

Module	Purpose
Inquiry Management	View all inquiries submitted through the website, including selected date, shift, client information, and event details.
Hero Section Management	Manage Hero text, supporting content, CTA information, and background image.
About Us Management	Manage company introduction, brand story, service approach, values, and images.
Gallery Management	Manage albums, album covers, descriptions, and album photos.
Facilities Management	Manage facilities, amenities, capacities, images, and descriptions.
Vendor Management	Manage vendor information, categories, images/logos, contact details, and promotions.
Client Review Management	Add, edit, remove, or hide client testimonials and related information.
FAQ Management	Add, edit, remove, organize, and reorder FAQ questions and answers.
Contact Information Management	Manage phone, WhatsApp, email, address, map/location, social links, and contact hours.
Footer Management	Manage footer links, contact information, social links, policy links, and copyright content.

11.1 Inquiry Count Management

Purpose

Allow the Admin to control the inquiry count displayed for each date on the public **Query Calendar**.

The current website requirement is that every calendar date can display the number of inquiries received for that date, but this information must **not indicate actual venue availability or confirmed booking status**.

Inquiry Count Controls

Feature	Details
Real Inquiry Show — ON / OFF	Controls whether the actual number of inquiries submitted for each date is displayed on the public Query Calendar.
Real Inquiry Count	Automatically calculated from actual inquiries received through the website for each selected event date.
Manual Inquiry Count — ON / OFF	Allows the Admin to display manually entered inquiry counts instead of real inquiry counts.
Date-Wise Manual Entry	Admin selects a date and enters the inquiry count that should appear publicly for that date.
Edit Manual Count	Admin can update the manually entered count for any date.
Manual Count = 0	Admin may set the displayed inquiry count to zero where required.
Save / Update	Saves the entered count and updates the Query Calendar display.
Display Control	The selected count source determines what visitors see on the public calendar.

Recommended Display Logic

To prevent two different inquiry counts from being displayed for the same date, only **one inquiry-count source should be active at a time**:

Option 1 — Real Inquiry Count ON
→ Calendar displays the actual number of submitted inquiries.

Option 2 — Manual Inquiry Count ON
→ Calendar displays the Admin-entered count.

Option 3 — Both OFF
→ Calendar displays the date without an inquiry count.

If **Manual Inquiry Count** is enabled, it should replace the real count on the public website without modifying or deleting the actual inquiry records stored in the system.

Example

Date	Real Count	Manual Count	Displayed Count
25 Sep 2026	12	—	12
26 Sep 2026	7	15	15
27 Sep 2026	3	8	8

Manual counts are **display values only** and must not affect actual submitted inquiries.

Important Business Rule

Inquiry counts—whether real or manually entered—must never be treated as:

Available / Unavailable / Booked / Reserved

The current PRD explicitly states that the Query Calendar shows inquiry activity only and that final availability will be confirmed by the Elite Convention Hall team after reviewing the submitted inquiry.

11.2 Inquiry Management

Purpose

Provide Admin users with a centralized area to view all event inquiries received from the public website.

The website inquiry process collects the client's preferred date and shift before the inquiry form, and the selected information is automatically carried into the form.

Inquiry List

The Admin should be able to view all received inquiries in a structured list containing the key information required to identify each inquiry.

Information	Details
Client Name	Full name submitted by the client.
Phone Number	Client contact number.
Email	Client email address.
Preferred Event Date	Date selected from the Query Calendar.
Preferred Shift	Day Shift or Night Shift.
Event Type	Type of event selected by the client.
Number of Guests	Estimated guest count.
Company / Organization	Company or organization information where provided.
Additional Details	Additional event requirements or information submitted by the client.

These fields align with the existing inquiry form requirements in the PRD.

Inquiry Details View

When an Admin opens an inquiry, the system should display the complete submitted information together in one detailed view:

Selected Event Details

- Preferred Event Date
- Selected Shift

Client Details

- Full Name
- Phone Number
- Email

Event Details

- Event Type
- Number of Guests
- Company / Organization
- Additional Details

The Admin can then review the inquiry and use the provided contact information to communicate with the client regarding actual venue availability and further event requirements.

Inquiry Management Flow

Client Submits Inquiry
→ Inquiry Stored in Admin Panel
→ Admin Opens Inquiry Management
→ Views Received Inquiries
→ Opens Inquiry Details
→ Reviews Date, Shift & Event Information
→ Contacts Client

The current PRD already establishes that submitted inquiries are reviewed by the Elite Convention Hall team before actual venue availability is confirmed.

11.3 Hero Section Management

Admin can manage:

Content	Admin Action
Background Image	Upload / Change
Tagline	Edit
Main Heading	Edit
Supporting Description	Edit
CTA Text	Edit
CTA Destination	Manage

11.4 About Us Management

Admin can manage:

- About Us introduction
- Brand story
- Service approach
- Experience / strengths
- Brand values
- Venue images
- Key highlights

11.5 Gallery Management

Album Management

Admin can:

- Create Album
- Edit Album
- Delete Album
- Upload Album Cover
- Set Album Name
- Add Album Description
- Publish / Hide Album

Photo Management

Within each album, Admin can:

- Upload photos
- Delete photos
- Reorder photos
- Replace photos

The public Gallery already follows the structure **Homepage Gallery Preview → All Albums Page → Individual Album Page**.

11.6 Facilities Management

Admin can manage:

Content	Admin Action
Facility Name	Add / Edit / Remove
Facility Image / Icon	Upload / Change
Description	Edit
Capacity	Add / Update where applicable
Amenities	Add / Edit
Service Features	Add / Edit

Only facilities actually confirmed by Elite Convention Hall should be published.

11.7 Vendor Management

Admin can manage:

- Vendor Name
- Vendor Category
- Vendor Logo / Image
- Short Description
- Contact Information
- Website / Social Link
- Promotion Details
- Show / Hide Vendor

Only approved vendor information and confirmed promotional offers should be displayed, consistent with the existing PRD.

11.8 Client Review Management

Admin can manage:

- Client Name
- Review / Testimonial
- Event Type
- Rating
- Client Photo where approved
- Show / Hide Review

Only genuine or approved client reviews should be published.

11.9 FAQ Management

Admin can:

- Add FAQ
- Edit Question

- Edit Answer
- Delete FAQ
- Reorder FAQs
- Organize FAQs by category
- Show / Hide FAQ

The public FAQ is already designed to cover inquiries, facilities, event types, capacity, services, payments, and venue policies.

11.10 Contact Information Management

Admin can update:

- Phone Number
- WhatsApp Number
- Email Address
- Venue Address
- Map / Location Link
- Social Media Links
- Contact Hours

This keeps the Contact Us section editable without requiring code changes.

11.11 Footer Management

Admin can manage:

- Elite Convention Hall logo
- Quick Links
- Contact Information
- Social Media Links
- Location Link

- Privacy Policy
- Terms & Conditions
- Other applicable policies
- Copyright Text

Admin CMS Flow

Admin Login
→ Admin Panel / CMS
→ Select Module
→ Add / Edit / Update Required Content
→ Save Changes
→ Updated Content Appears on Website

For inquiry-related operations:

Admin Panel
→ Inquiry Count Management / Inquiry Management
→ Manage Display Count or Review Received Inquiry
→ Website Calendar Updates / Client Follow-Up

Core Admin Requirement Summary

The most important Admin functionality for this project will be:

Inquiry Count Management
→ Real Inquiry Show **ON/OFF**
→ Manual Inquiry Count **ON/OFF**
→ Date-Wise Manual Count Entry

and

Inquiry Management
→ Receive all submitted inquiries
→ View selected date and shift
→ View complete client information
→ View complete event information
→ Review inquiry details for client follow-up

This Admin scope extends the current public-facing PRD, whose existing website structure and inquiry workflow are already defined for client review before development.
